Achievers Learning Zone is a community based tutoring program which seeks to build student aptitude in core subjects. We are a coalition of experienced educators and mentors utilizing certified teaching staff and dedicated volunteers. We sit down with parents, teachers and school officials to find out exactly what the students are learning and how we can help them best master the material.

Our management team has examined the PSSA standards and has created our own table of contents, tied to each specific book/grade level and intended to allow our tutors to quickly reference the part of the PSSA standards that our student is receiving tutoring for.

We create a customized lesson plan for every student so that we can build on their strengths and improve any weaknesses. Our way of improving student achievement is to give our students as many tools for academic success as they can handle.

Thousands of students have successfully completed American Tutor’s after school program and consistently shown improvement in test scores and classroom performance. We use Options Publishing’s Reading and Math Intervention Kits for our curriculum, which is in alignment with the District’s curriculum as well as Pennsylvania’s State Standards.

Students learn problem solving skills using real life, motivating, hands-on activities. Students strengthen reading skills and build strong vocabularies with high-interest, nonfiction articles and stories.

Pre-tests are administered to pinpoint areas that each student needs to focus on. Each student receives an Individual Achievement Plan with individual goals. Parents and classroom teachers are updated on student progress. Ongoing assessments are given to ensure consistent student success. Final assessments are given to measure growth. Children who regularly attend our classes showed an approximate 35% increase in test scores from our assessment test to our post-test.

Our classes are held two to three times a week for 60 to 90 minutes each. We provide all books and supplies to the children and our average class size is 5 students to one teacher.

American Tutor helps students build confidence, self-esteem, and boost test scores.

A+ Test Prep and Tutoring has been in business since 1992. Our goal is to bring your child up to his educational potential. We provide ONE-TO-ONE tutoring in reading and mathematics. Your child will be pre-tested to determine grade levels, and to figure out which areas of reading and math he needs to work on in order to come up to grade level.

Based upon his pre-test results, we will design an individual learning program specifically tailored to your child's needs. Our curriculum is aligned with both the School District of Philadelphia's curriculum as well as the PA State Education Standards.

Since all of our tutoring is one-to-one, our program is very individualized. Instruction is provided at your child's instructional level and we will work with him until he masters the material presented. Our tutoring program consists of 2 one-hour tutoring sessions per week, and will last for about 40 hours total (this depends upon the per pupil allocation provided by the State of PA). Our reading and math programs are based upon the latest educational research. All A+ tutors are thoroughly trained, are encouraging but firm, and love helping kids achieve their potential.

Apple Educational Services dba Ivy League Learning 545 Interstate Pl Carlstadt, NJ 07072 Emrah Ayhan 908-619-5380

Locations	Grades	Days and Hours	SLEP*	SWD**	Session	Region***

IVY Learning's mission is to give every child the best education possible. In order to fulfill this mission, individualized tutoring programs are established for every student. At intake, every student is administered a variety of grade-specific tests that provides us with a snapshot of profile of the student's current skills inventory in Vocabulary, Reading, and Mathematics.

Each student is provided with an individualized curriculum plan that the tutor follows as a daily lesson plan. Daily record books are provided for each student and completion and grading are recorded for every exercise.

Tests will be administered continuously throughout the tutoring program designed for each child. Based on these test results, student's tutoring forms a shape at their comfort and proficiency level. For example, a 7th grade student who shows reading proficiency at the 4th grade level will continue his/her level at that level. In mathematics, the pre-testing is designed to show specific skills that student possesses or lacks. This same 7th grader may well continue their tutoring with a review of regrouping in subtraction and building up to pre-algebra skills.

In order to achieve our goals of improving student's skills performance and achievement, we will provide individualized curriculum that is designed for that specific students based on test data, school data and performance during tutoring.

Because our marketing target is wide variety of schools, our curriculum is based on Pennsylvania State test materials in the minimum base. The students performance skills will be gradual build up to school's curriculum.

ATS Project Success 20674 Hall Road Clinton Township, MI 48038 Renee Weaver-Wright (800)297-2119

Locations	Grades	Days and Hours	SLEP*	SWD**	Session	Region***
Student's home	K-8	online	yes	yes		

ATS Project Success offers math and reading tutoring online, in the comfort, privacy, and safety of the student's home. Pearson Digital Learning's integrated learning system, SuccessMaker®, is used as the curriculum to ensure that the program is directly connected to Pennsylvania's State Standards. SuccessMaker has an ongoing assessment tool built into the program, called the Initial Placement Motion (IPM). Once the student begins tutoring, he/she is assessed by the IPM. The assessment consists of about 300 questions and takes approximately 2-3 hours for the student to complete. By determining the student's instructional level with IPM, the curriculum is set and adjusted to provide activities at the appropriate level. Students have access to tutoring 24 hours a day, 7 days a week including before or after school, evening, weekends and school vacations. Our program is flexible, and families can choose a schedule that best meets their needs. Students are evaluated, monitored, and tracked on a daily basis. We expect students to increase their instructional level 1/10th of a level every 2.5 hours they work in the program. Parents are contacted weekly by telephone, and monthly by mail, for a report on student progress.

Beloved CDC 4541 N. Broad Street Philadelphia, Pa 19140 Michael Beauford 215-329-5140

Locations	Grades	Days and Hours	SLEP*	SWD**	Session	Region***
4541 N. Broad Street	1-8	Monday thru Thursday 4:00 p.m - 6:00 p.m.	N/A	N/A	2 hours	North

The goals of the Beloved CDC After School Program are to create an academically focused and safe environment for all of our students. Our main objective is to improve test scores for our under achieved students. We will also provide conflict resolution, social skills, and peer mediation classes for our at risk children. Students will be assessed three times during the SES services. There will be a pre-assessment to establish the individual needs of each student in reading and math. There will be a mid-level and final assessment to evaluate effectiveness of instruction and materials used in the program. The education process will involve the students' parents and teachers. We will keep an open line of communication with the schools so that we can provide individualized attention to the students. The students will participate in guided reading sessions as well as test prep using TerraNova materials and Measuring Up for PSSA. Math and reading will be taught using the approved computer software Encore: After School Program.

Beyond the Basics Educational Services

Beyond The Basics (BTB) is committed to reducing the education achievement gap. BTB understands that children learn differently; therefore we provide a variety of materials and teaching strategies to supplement the school day and give students the skills needed to compete in the 21st century.

Our curriculum helps K-12 students succeed while having fun! Tutoring takes place at school or at neighborhood locations. BTB provides 40 hours of instruction. BTB uses web programs, educational games and workshops to reinforce learning. Distance Learning is available for students with computer and internet access.

Students are assessed/diagnosed using pre, mid and post tests. BTB will create customized learning plans to determine materials to be used based on individual learning styles. Monthly progress reports will be shared with the student's teacher and parent.

BTB will improve student achievement by providing tutor support, research based curriculum and a participation incentive program. Our parent involvement program includes special activity days to encourage parent understanding of how to support learning efforts of students.

Our curriculum is aligned with Pennsylvania Standards and Anchors and Philadelphia's curriculum. Our approach to tutoring is unique and we research the best methods to assist students in reaching their full potential.

Our goal at BMF After-school program is to provide a stimulating, creative atmosphere where children are motivated to learn by interacting with caring, qualified instructors in a small learning community. Our main goal will be to improve test scores on Academic Standards by expanding their Reading and Math skills. We will do this by using all content areas of the Pa Dept. of Education Academic Standards for Reading, Writing, Speaking and Listening. We will stimulate their interests through Science, Music and the Arts including all School District areas of Academic Standards. We will provide books, educational games, computer software and manipulatives to explain their language proficiency and Mathematical Comprehension. We will test each child coming into the program for performance levels. We will test mid and post program to document growth and achievement. Testing will be taken from the Terra Nova and QRI performance tests. We will file written reports monthly and communicate daily with Parents. We will build their social skills by giving personal attention to peer interaction and conflict resolution believing that by helping children improve socially and academically, we will increase their desire to be an active classroom participant.

Club Z!, the nation's largest supplemental educational service provider, delivers the individualized instruction students need to meet their educational goals. Club Z! offers approximately 43 hours of one-on-one instruction at an approved public space or bookstore most convenient for the student. There are also four classrooms available at the schools listed above. Only this Club Z! has 4 years of experience in the Philadelphia School District.

Club Z! tutors are highly qualified certified teachers or degreed professionals with heartfelt enthusiasm for teaching. Club Z! provides services for reading and mathematics through a curriculum by Pearson Education that addresses Pennsylvania State and standards and district curriculum. Pre-assessments will be conducted that will aid in diagnosing student needs, and preparing their achievement goals/progress reports. Parents are included in every aspect of the tutoring program, such as setting goals and determining whether progress has been made.

Students who complete Club Z!'s services show, on average, a year's worth of growth. So, start your child on the road to academic success by joining the Club Z! club today!

The first three students to complete the entire program will receive a \$50 gift certificate. All students that complete the program will receive a certificate of completion.

The Kinetic Potential Scholars (KPS) program is a long-term tutoring program that reverse engineers the academic and social progress of at-risk youth. Our organization is founded upon the core belief that every child has remarkable potential but that too often such potential is never put into action and made "kinetic". As an online tutoring program pairing students (grades 3-9) with top quality educators, KPS is dedicated to not only using cutting-edge technology to increase student performance, but also utilizing the talent of this nation's top universities (including Harvard, Yale, & the University of Pennsylvania).

KPS diagnoses every entering student's needs in the subjects of Mathematics and Language Arts using a standardized, criterion-referenced test. Results on our online pre-test alongside a student's grades and standardized test scores are used to build a distinct Individual Learning Plan (ILP) for every entering student. As a "roadmap" for where a student needs to grow academically and socially, every ILP has its own prescription for student improvement. Aligned to Pennsylvania state standards through Align-Pro technology, our curriculum addresses students' particular learning gaps to ensure that progress within our program (measured by a standardized post-test) also equates to progress within the classroom and on state exams.

Education Futures Corporation exists to help students take a unique and innovative approach to learning that helps them connect with the Commonwealth of Pennsylvania's core curriculum standards and master the skills needed to be successful in this world. Through personalized teaching process, they develop academic and social skills to succeed. It's designed for children who demonstrate math and reading difficulties and are performing below grade level in these subjects. Diagnostic assessments, routine evaluative methods, pre-test and post-test provide school district employees and families evidence of progress. Instructional staff provides regular feedback to the students' family and school. Students are provided with consistent encouragement and opportunities for success.

Our activities are designed to help students achieve proficiency in the Mathematics and Language Arts Literacy. Our curricula materials are custom designed to correlate with School District of Philadelphia curricula. One of our most successful and highly used curricula is our AfterSchool KidzLit and AfterSchool KidzMath by Developmental Studies. Alignment with standards ensures that our students will be working on content that is similar to what they see in class in engaging and fun activities.

E.nopi is a proven and effective Math program from South Korea. Since 1976, E.nopi has been providing students with a highly individualized learning program focusing on both Basic and Critical Thinking Math. E.nopi Math is a flexible, individualized self-learning program that provides a systematic approach to improve learning in Math. All students will initially take an E.nopi Diagnostic Test which will pinpoint their strengths and weaknesses, and allow a certified teacher to find their starting point in the E.nopi program. Within our SES program in New Jersey, students on average had a 40.02% improvement rate between their pre-test and post-test in the E.nopi program. E.nopi Math is aligned with the National Council of Teachers of Mathematics (NCTM) and the United States Department of Education (USDOE).

Experience Corps is a nationally recognized tutoring program that engages retirees 55+ to provide intensive 1:1 and small group tutoring for students in grades K-5. Based upon a two-year study by Washington University, the U.S. Department of Education recently named Experience Corps as a top-tier instructional program.

Tutors complete rigorous training in instruction, child development, learning theory, tutoring techniques and academic assessment. Supervised by trained professional staff from Temple University, Experience Corps-SES uses the American Book Company's 100 Book Challenge model – a reading intervention and theme content program that focuses on comprehension, fluency, vocabulary development and writing to build independent reading skills. The Theme & Genre Models in the program are text-sets that are aligned with both the school district's curriculum and Pennsylvania state standards. It is designed to supplement current core basal textbooks and/or be used as a stand-alone curriculum. In addition to the instructional model assessment tools, students are assessed using PSSA scores for literacy, DIBELS for early readers, DRA and Gates-McGinite.

Experience Corps – winner of Archstone Award for Excellence and highlighted in Education Week, Wall Street Journal, US News & World Report, New York Times, Philadelphia Inquirer and The Daily News, NBC Evening News and NPR.

The 2009-10 Foundations SES Program will be utilizing state approved research-based models as follows: Reading & Math SuccessMaker in grades 1-6 and Study Island for literacy and Accelerated Math in grades 9-12. Diagnostic assessments from all three program models will be administered to determine the exact place where each student needs to receive remediation to assist them in working towards and obtaining

mastery. Additionally, weekly benchmark assessments along with daily observation assessments will be made by each tutor. Accommodations will be provided according to how each student pre-tests, and in compliance with IDEA where applicable. Individual students work portfolios will be created and shared with the students while being made available for teacher and parent reviews. Students will also have a role in identifying areas of weakness and celebrating successes. A minimum of four interim progress reports will be provided for parents. The publishers have all documented extensive research-based evidence that supports their effectiveness and alignment with PA Reading & Math Academic Standards and the School District's Core Curriculum. All consumable materials utilized will be given to the students at the conclusion of the SES program. An afternoon snack will be provided prior to each SES session. Transportation not provided

Glen Mills School P.O. Box 5001 Concordville, PA 19331 Randy Ireson 610-459-8100

The Glen Mills Schools has provided service to youth since 1826. The Glen Mills Schools Supplemental Educational Services (SES) program will use a variety of research-based math and reading interventions. The math intervention programs are TransMath (5-10) and Voyages (K-5). TransMath is a skills-based curriculum that targets instruction to fewer topics, taught in greater depth. Voyages is an elementary math program with two components: Anchors and Excursions. Anchors develops an understanding of mathematics skills and concepts while Excursions provides an activity-based approach. Both of these programs provide initial assessment/diagnostic tools and include on-going assessments as a guide to further instruction.

The reading component includes Kaleidoscope (K-8) and Read to Achieve (6-12). Kaleidoscope is a complete language arts intervention program which uses a balanced literacy approach. Read to Achieve teaches middle school and high school students how to access content at higher levels. With both reading programs, student's needs will be assessed and appropriate instruction provided at each student's achievement level.

Students will receive instruction at their own math and reading levels. Value-added assessment will measure student growth from their initial levels to their current levels. All curriculum materials are aligned to state and district standards.

Global Partnership Schools is committed to engaging parents as partners to ensure their children are given every opportunity to aim high, dream big, and reach their goals. Our specially trained teachers offer a unique after-school experience in a safe, caring environment that enhances learning and advances well-being. They work together with parents and take a holistic approach in assessing needs and developing each child's individual learning plan that will guide instruction. *Global Partnership Schools will open new doors using technology that makes learning fun in a more meaningful way while expanding a child's capabilities.* We will work to identify and remove barriers to learning and provide extra attention to the unique needs of special education students and English language learners from all cultural backgrounds. Parents know their children better than anyone, and Global Partnership Schools understands the invaluable contribution they have on their child's academic success. Working together, we can help children succeed in school and enter the world with boundless opportunities for improving their own lives and the world around them.

1712 S. 56th Street, Phila., PA 19143	K-9th	Monday and Wednesday 3:15pm – 5pm Saturday 9am – 12pm		x	1.5hrs. 3 hrs	South West

The "Pump It Up" initiative will provide academic tutoring for students kindergarten – 9th grade in Math & Reading after school and on Saturdays. The goal of "Pump It Up" is to provide intensive skills-based instruction to small groups of students. Our tutoring model will utilize researched-based materials that focus on Pennsylvania Assessment anchors, hands-on activities aligned with School District of Philadelphia Curriculum and Computer-based programs that will reinforce the small group tutoring. We will have dedicated tutors and teachers to deliver our curriculum and make it meaningful and rewarding for participants.

Based on PSSA and TerraNova scores, 4Sight data and teacher input, participants will be placed in small groups that address their individual needs. They will receive a pre test at the start of the program and a post test at the end. Throughout the program parents will receive progress reports to track student performance.

The program will take place 3 times per week, for 1.5 hours sessions during the week and a 3 hour session on Saturdays. Snacks will be provided on the weekdays and a light breakfast on Saturdays. The program will close with a "Pump It Up" luncheon for participants and parents.

Huntington Learning Centers, Inc. provides high quality SES tutoring services, designed to improve every student's basic learning skills. Huntington provides instruction to students in grades K-12 in either reading or math.

Based on the results of our diagnostic testing, we tailor an individualized learning plan for each student designed for their individual academic needs. We focus on your student's unique academic trouble areas. Our maximum student-to-teacher ratio is 6:1, and we employ 1:1 instruction as needed.

Huntington's research-proven model of small group instruction and reduced class size is designed to ensure highly-personalized attention to your student's education.

Huntington works directly with school staff to ensure that our content and instruction are aligned with what the student is learning in their local classroom, by structuring our curriculum around the Instructional Goals of your local district. Centers in the Pennsylvania are very familiar with Pennsylvania's Academic Standards at all grade levels. Our curriculum provides excellent preparation for the Pennsylvania System of School Assessments in reading and math. Our ongoing assessment process guides us to which skills must be re-taught or newly introduced in order for the student to master the goals set forth by their district.

Innovative Educational Programs d/b/a/ Learning Alliances 287 Childs Road Basking Ridge, NJ 07920 Gerry Galderisi 908-630-9600

Hopkinson Elementary School 400 L. St Phila, PA 19124	k-8	Monday - Thursday 1.25 hours a day after school	X	X	1.25 hours	East

IEP/ Learning Alliances program is a scientifically based curriculum model offering effective instruction in reading/language and mathematics. Our direct instructional program focuses on teaching one skill per lesson. Due to the small group size, teachers assist students during their practice period, giving helpful attention where needed.

To ensure that instruction is individually guided, we utilize the CTBS TerraNova Basic Battery, a diagnostic and comprehensive assessment used to identify strengths and weaknesses for all students K-8. Pre-test results are used to develop Individual Student Learning Plans. Students are given regular progress assessments to monitor their growth.

Because of the IEP instructional delivery model, teachers hold informal student assessments weekly to help determine if the learner is reaching their goals.

High expectations for student performance, accountability, scientifically based teaching methods and a results-oriented work ethic define IEP's Program Model to ensure effective learning outcomes.

IEP's curriculum consists of the research-based programs of Scott Foresman's Content Area Readers and Math Around the Clock. The Pennsylvania evidence based tutoring models recommends following Big Ideas in Reading: Phonemic awareness, Alphabetic Principal, phonics, fluency and vocabulary. IEP's mathematics curriculum is aligned with NCTM's ten recommended standards which are included in the Pennsylvania Academic Standards for Mathematics.

Institute for the Economic Development of Children 42 W. Harvey St Phila, Pa 19144 Cherylyn Tripp 215-844-7758

All mathematic instruction aligns with the National Council of Teachers of Mathematics standards and the PA state mandated curriculum standards for each grade level. The reading program incorporates the key reading elements: phonemic awareness, phonics, nonfictional/ fictional analysis skills and guided oral reading. The reading program also incorporates vocabulary building and dictionary skills which is a key ingredient for

reading comprehension. All students are pretested before instruction begins to determine the content areas that need to be taught. Monitoring of each student is ongoing through observation of classwork, student responses and school grades. Students are mid- term and post- tested to determine what areas were strengthened. Maximum teacher to student ratio during math or reading sessions is 1:10. Teachers and parents are consulted and informed about the student's progress and are provided written progress reports monthly.

Intellectual Pursuit, Inc **5421 Germantown Ave.** **Philadelphia, Pa. 19144** **Bernadine Abad (215) 438-4400**

Each participant receives a customized learning plan to address the individual's educational needs. The learning plan is a prescriptive plan for all content which the student will need to learn by the end of the school year. Private/small group tutoring is provided by a tutor on a weekly basis for 2 hours per week. Tutors use various tools to facilitate a tutoring session, i.e. customized web--based lessons, paper-pencil worksheets and visual aids to teach and/or reinforce the classroom lessons and to practice what they know using important Math and reading concepts. Each student will be tested three times a year to measure their progress. Participants that attend regularly will begin to show improvements in their confidence to learn and their performance in the classroom quickly. The tutoring program uses resources which are closely aligned with the School District's curriculum for Math and Reading for grades K-12 for all content areas. Tutors are guided by the Pennsylvania State Standards to teach the Math and Reading content appropriate for grade level skills and to measure their proficiency in each area.

Intercultural Family Services, Inc. **4225 Chestnut Street Philadelphia, PA 19104** **Myra Brown 215-386-1298 ext. 245**

Intercultural Family Services, Inc. 4225 Chestnut Street Philadelphia PA 19104	6-8	Tuesday, Wednesday, Thursday 4:00 pm- 7:00 pm	Yes	No	45 min sessions	West

Intercultural Family Services, Inc. (Intercultural) will offer an individualized, results-oriented tutoring program primarily focusing on reading, math, and science skills for students in grades 6-8. Tutoring services will be offered at 4225 Chestnut Street from 4-7pm three days per week with two hours of academic activities and one hour for meal/transition time. A snack and a hot dinner will be served daily.

Intercultural will utilize the Scholastic Read 180® model which incorporates PA State Academic Standards for reading, writing, speaking, listening and community involvement and will be delivered in a manner that is consistent with the student's classroom course content through close communication with their teachers.

Each student's individual needs will be determined through meetings between Intercultural's instructors, parents, and classroom teachers, a review of past assessments, and the use of additional literacy assessment tools, all resulting in an Individual Learning Plan. Through small group instruction, modeled and independent reading, and computerized instruction, each student will meet his/her individual goals. Creative activities to reinforce these skills and better engage students will be incorporated through art, music, and problem solving skills.

Intercultural will offer a diverse array of services available through the agency to support parents.

Kanmas provides the following to help your child in the tutoring process:

Diagnostic Assessments is administered at the beginning of each tutoring period to provide a deeper understanding of student's deficiencies, to guide instruction, and to prepare customized tutoring package for each student.

Students are also assessed at the end of the tutoring term to evaluate their improvement on the subject/s taught.

Services offered will improve student achievement by using over 20 academic performance improvements (API) strategies and hands-on-learning activities to help each child learn independently. This has been shown to improve the achievement of 86% of participants.

Student progress is communicated to parent and classroom teacher through monthly meeting, letters and academic advising session to review academic progress.

Tutoring services are delivered in small teacher-student ratio of one-on one to small learning community of maximum of five students per tutor. Program Alignment with state Standard- KESK SES program is in alignment with the School District's curriculum and the state standards and designed to reinforce the content behind the state standards.

KheperaELA uses Options Research Based Reading and Mathematics Programs and PSSA Anchors to assist students in achieving proficient level on the PSSA test. Students are assessed and diagnosed using Options Intervention Assessments. Individual needs are addressed using PSSA Anchors and Options assessment tools that identify math and reading concepts in key areas that are difficult for the student. Individual packets will be developed. Achievement is improved by (1) providing services embedded in research and staff development that are based on state and local standards, (2) reviewing benchmarks, (3) using appropriate assessment tools, and (4) encouraging parental involvement. Our tutoring service reinforces classroom learning, and builds school competence. Students' progress is reported monthly. Our program is aligned with the following state and local standards, and School Districts Curriculum in reading and math:

Reading	Math
Learning to read independently	Understanding Numbers, Number systems and Number relationship
Reading critically in all content areas	Computation and estimation
Reading analyzing and interpreting literature	Measurement and Estimation
Types of writing	Mathematical Reasoning and Connection
Quality of writing	Mathematical Problem Solving and Communication
Speaking and Listening	Statistics and Data Analysis
Characteristics and Functions of the English Language	Probability and Prediction
	Geometry
	Healthy snacks daily and Saturday

KnowledgePoints* is a company founded and focused on a single purpose: helping children. Our vision is “creating success by changing lives”. We have put this vision into practice by using our high-quality supplemental education programs to help thousands of children throughout the United States. Locally, KnowledgePoints has provided almost 50,000 hours of tutoring to students in grades K through 12. The KnowledgePoints program begins with a complete Diagnostic Assessment, using a series of tests to pinpoint students' specific needs. Our assessment provides a clear picture of your child's strengths and weaknesses. Following the assessment, we design an educational package specifically for your child's needs -- it's a unique individually tailored "prescription".

Dr. Litzenberger, an independent validator, concluded, “The KnowledgePoints tutoring program improves the performance of all students and can reduce the ‘performance gap’ that plagues our education system. KnowledgePoints is an effective tutoring program that provides skills in reading and math leading to success in the classroom.”

KnowledgePoints curriculum meets national standards in which all states must comply. We also work closely with the schools and districts in which we serve to modify lessons to align skills and strategies to ensure students are meeting state and district standards.

Learning for the 21st Century – Providing children the knowledge and skills they need to succeed in school and in Life!

Learner First’s unique blend of Live Online or Face to Face Tutoring with Unlimited Access to an Individualized Learning Path has enabled hundreds of students each year to improve their grades and build confidence they need to thrive. Learner First hires highly qualified state certified teachers who are familiar with Pennsylvania State Standards.

With Learner First, Students Receive:

Live Online Tutoring with the same Certified Teacher each week. Our tutors receive rigorous training on how to address student’s individual needs and are certified in the area that they are tutoring in; Unlimited access 24 hours a day 7 days a week to their online Individualized Learning Path; A proven diagnostic assessment that pinpoints a student’s areas of need and the confidence to succeed!

Come find out why parents are saying “my child was getting 40s and 50s in school and now they are getting 70s and 80s.” And students are saying “I wish all my classes could be like this.”

Main Line Z, LLC (dba Club Z! Tutoring Services) is a high quality, evidence-based program that is specifically designed to increase student academic achievement by leading students from dependency on others to solve problems to solving problems independently with confidence. Each Club Z! instructor undergoes professional development training on the Pennsylvania Academic Standards for reading and mathematics. Prior to the onset of tutoring, Club Z! contacts the school district to review documentation of student performance and academic needs including prior 4Sight assessment results. Once this is complete and we have submitted identified goals for approval to applicable school staff, input from parents, teachers and other school staff, and data from past 4Sight assessment is utilized to develop a Student Learning Plan with specific, measurable, timely, relevant and realistic agreed-upon academic goals and objectives that can be attained. Club Z! maintains consistent communication on a minimum of a monthly basis with the classroom teachers to ensure that tutorial sessions are aligned with classroom instruction. Monthly progress and attendance reports are disseminated to appropriate parties highlighting the goals being addressed during that period, each student’s achievement toward these goals, areas in need of improvement, and methods and suggestions the parent/guardian and the classroom teacher may wish to use to enrich the student’s academic experience.

One On One Tutoring Service, Inc. uses the Compass Learning Odyssey, an award winning Pre K-12 curriculum with assessments. This standards-based program allows our instructors to provide interactive, self-paced, challenging, and engaging instruction with activities. The results of the initial assessment enables us to create a learning path that helps students build a solid foundation in order to master the objectives needed to meet state standards. One On One Tutoring Service, Inc. also uses Moving With Math, a research based mathematics program that utilizes a series of activity modules. These activity modules are used to emphasize thinking strategies by using manipulatives and guided practices to teach clearly stated measurable objectives within a problem solving context. These objectives serve as a guide for the tutor. In order to align our selected tutoring modes with school district curriculum and state standards, students will be assessed using a Pennsylvania state, standards-based, criterion-referenced test. This pre-test will allow One On One Tutoring Service, Inc. to identify student weaknesses per standard and to develop an appropriate learning path for each student. The following standards will be assessed per grade level in reading/math.

A+ Grades Up is a company founded and focused on a single purpose: helping children. Since 2002, we have put this into practice by using our high-quality supplemental education programs to help thousands of children throughout the United States.

The A+ Grades-Up tutoring program begins with a complete Diagnostic Assessment using the Achieve Test. This test is given prior to and at the completion of the tutoring program. It is administered individually to ensure your child's specific needs are met and they achieve their greatest growth. Results from the assessment assists us in designing an individualized program for your child based on their strengths and weaknesses. Our Program and instructional materials are based on recommendations of the National Reading Panel Guidelines and the National Council of Teachers of Mathematics Guidelines.

A+ Grades-Up's Program is also designed to be consistent with the academic program each student experiences during the regular school day. We ensure such consistency through our choice of learning materials that align to the state's Academic Standards, which also guide instruction in the local classrooms. We work closely with the schools, districts and parents to ensure we are meeting the standards set by all.

Overbrook Learning Center 7708 City Line Avenue 2nd Floor Suite 215 Philadelphia, Pa 19151 Fred Boccella 215-877-8801

Overbrook Learning Center has been a tutoring school for 20 years. Our comprehensive curriculum aligned to state and school districts standards makes it possible for us to offer instruction to the many districts surrounding our City Line Avenue location.

Students who enter our programs are evaluated in Reading and/or Math. An individual learning plan is established with the parent. Reading difficulties are addressed with Reading Recovery for the younger students and Harcourt Literacy for middle and upper students. Harcourt and Holt provide math structure for elementary and middle school children. High school math instruction is aligned to specific grade courses with emphasis on developing skills for grade level success. Progress is monitored by teacher evaluations and tests.

Overbrook Learning center has high, but realistic, expectations for our students' achievements. Attendance, homework, and progress are carefully monitored and acknowledged.

Our faculty's commitment to our children's academic success has been recognized by the parents, children, and the districts we serve.

Online	3-12	M-Thurs- 3:30-4:30 PM	Y	Y	60 minutes	Community center

Reach For Tomorrow, Inc. (RFT) uses a web based enrichment program, Extralearning Online, which has enabled students to show an average of 2 grade levels (years) improvement in 30-35 hours. Students are initially tested using tests embedded in the program to establish their current grade level proficiency in reading, writing, and math and then further tested to identify the gaps in each

of these subject areas. For those in grades 5-12, we also assess students using the Test of Adult Basic Education (TABE). RFT creates a personal curriculum customized for the student based on their needs, and each student learns through reading text and working with interactive multimedia training programs addressing all learning styles, i.e., visual, hands on, and auditory. Students are managed in 1 hour sessions in a community center based computer lab by a local teacher trained by RFT. Each student gains daily access to a live tutor through this web based program from after school 7 days a week to assist with current homework. This program is directly aligned with district and state standards, and local teachers will ensure the material presented is in concert with these standards.

Smiles Are Free Enrichment Center is determined to prepare your child for their future. We have professional staff – certified and qualified to reach your child and take them to their next academic level. Our curriculum model feeds off of our motto, which states, “Participation Is the Key That Unlocks the Ability”. We will provide clear, systematic, research-based instruction in Mathematics, Science and Language Arts.

We offer engaging activities that combine to activate, motivate and accelerate the abilities of the K-12 student. Our On-Line video streaming technology and live broadcasting will provided our students, parents and schools with a cutting edge computer base program that will allow access to our services right from the convenience of ones own school and home.

We are dedicated to monitoring our student’s progress through weekly reports and progress charts. In compliance with school regulations we will compare school assessments with our informal assessments to track weaknesses and provide direct instruction until students master the required skill.

Stay on Top Tutoring Service, Inc. (Since 1987) – offers tutoring to students in grades K-12th. We serve regular education and special needs students. The Locations will be within the student’s school or a nearby community location. Each student will be pre-tested and an individualized learning plan will be developed. Stay On Top curriculum models are "Options" for grades k-8th and the Web-Based model "Study Island" for grades 6th-12th. Each model offers an individualized, researched-based program in reading, mathematics and science. The reading program includes phonics, sight words, vocabulary, and comprehension. The math program includes basic math facts in addition, subtraction, multiplication, division, problem solving, fractions, measurement, algebra and geometry, algebra. The science program includes preview, review and post-test to help students learn test-taking skills for the PSSA and other tests. Some tests include Life, Earth & Space, Physical Science and Science inquiry. The materials used in our program are aligned with the student’s school curriculum and The Pennsylvania State Standards. Progress notes are written every 8-10 tutoring sessions. A post-test will be given to assess the students overall progress. Most tutors are state certified teachers or experienced tutors. All staff have valid security clearances. Gift- cards are given for good hard work, good behavior and perfect attendance.

Sylvan Learning Center is a licensed educational center with over 20 years of documented success working with neighborhood families and schools. This is our seventh year as a provider for SES. We use proven diagnostic tools to pinpoint educational needs. We create intensive, personalized programs from testing and parental input. Our instructors are all college graduates, most of whom are certified teachers with years of Sylvan and classroom experience. The teacher/student ratio is 1 to 3. Pre-testing and post-testing is given to measure growth and achievement. Each student's program is designed to address his or her individual needs in reading or math. Skills are taught from the earliest tested missed skills and guided practice and independent practice is used to ensure that skills are mastered. Academic standards for the Philadelphia District of Education and the PA state standards are followed to help each student realize his or her potential within our academic programs.

Sylvan communicates with parents, guardians, classroom teachers and the School District every month to report your child's progress. Our programs are designed to build skills, confidence and self-esteem.

The Terry Learning Centers have been providing after-school tutorial services since 2005. We have a proven history of making a difference in the lives of the children we have served. We tutor students in the areas of reading, language arts and mathematics. All of the curriculum we use is based on principles promoted by the National Reading Panel and the National Council of Teachers of Mathematics and is aligned with the Philadelphia School District's curriculum and the Pennsylvania Department of Education's standards. We utilize the Achieve Test to identify the strengths and weaknesses of our students and then develop an individualized learning plan to help each student achieve academic success. Instruction is delivered in two-hour sessions Monday-Thursday, each week for a total of six weeks. Our highly qualified tutors help students reach their potential by building on their strengths, remediating areas of skill deficiency, and utilizing strategies that help encourage their academic success. We communicate with parents/guardians, teachers, and the School District regularly regarding each student's progress.

The Church of the Living God 1301 S. 57th Street Philadelphia, PA 19143 Dr. Kate Osuala (215) 472-6456 or (267) 266-3661

The Church of the Living God Academy for five years in collaboration with parents and teachers have been very successful in advancing students academic achievement with proven record of improved test scores utilizing our curriculum and instructional strategies. Our model starts off with professional development of our highly educated and experienced teachers to familiarize them with instructional resources to ensure coordination and consistency. Our teachers must have at least a Bachelor's degree to teach K through 12 grades. Each student in accordance with grade level is given a pretest designed to measure where each student rates on PAS and PSSA Reading and Math standards. The benchmark score from the pretest determines our instructional plan of intervention for each student's needs. Because our benchmark assessment is aligned with PAS and PSSA Reading and Math Assessment Anchors, we will be able to measure students daily progress in their ability to read independently, analyze and interpret data and solve Math problems. As our tests and curriculum are aligned with the School District and with systematic monitoring of students progress, what we teach is bound to improve students' grades when we compare the initial test with the midterm and final tests. We mainly cover all SES eligible schools in West and South West Philly but will extend to other areas as needed. FREE TRANSPORTATION IS PROVIDED.

The Right Prep, LLC. 12008 NW 13th Street Pembroke Pines, FL 33026 Tawanda D. Lane, Esq 1-888-431-3075

Instruction provided through our program is focused, intensive, and tailored to meet the unique needs of each individual student. Prior to tutoring session, students take a pre-test which help pinpoint their specific learning needs, challenges and strengths. Following the pre-test, our tutors review the student’s diagnostic results, the student’s standardized test scores, information from their IEP and/or 504 plan if appropriate, class grades, parent and school provided psycho-social information, and the teacher’s instructional plans and achievement goals for the student. All of this information is considered in the completion of the Student Learning Plan. The Student Learning Plan identifies areas of strength and weakness, short and long term achievement goals, benchmarks and timelines, and the specific content area (math, reading or language arts) and skill sets that the tutoring sessions will focus on during the upcoming program. The program chosen provides printed matrices that connect the Pennsylvania State Standards benchmarks with the programs learning activities. Students participate in small group as well as individualized learning activities, which utilize tutor-delivered instructional material.

Tutorial Services provides a web-based curriculum through Compass Learning that is aligned with Pennsylvania State Standards. Students take a pre-test to assess areas for improvement. Our certified teachers then create an individual learning plan based on each student’s specific needs. The program, which services Reading, Math, and Science, is entirely self-paced and operates 24/7 from your home. Our teachers supervise the program, monitor your child’s progress, and report to parents every 4 weeks via phone calls and mailed progress reports. We even provide a COMPUTER for your student to use in your home at no cost to you and reimburse you for high speed internet access. Our slogan, “Making a Difference, One Student at a Time”, is our promise to your child and you.

Penn’s Netter Center for Community Partnerships, in partnership with the Graduate School of Education, will provide K-8 students who are basic or below basic in reading or math with intensive tutoring support. Tutoring sessions will be staffed by current or retired teachers, and we will provide an average staff to student ratio of approximately 1:4 and never more than 1:6.

For students in grades K-4 in need of reading support, tutors will use Leveled Literacy Intervention (LLI) and Month by Month Phonics. Students in grades 5-8 will use Soar to Success and Vocabulary Their Way. Students in grades K-5 who need assistance in math but who are not significantly below grade level will use the "reteaching" component and game kits of their school day math curriculum, Everyday Mathematics to reinforce classroom learning. Middle school students use Britannica’s Math in Context during the school day and we will use the associated extended learning curriculum, Math in Context: Key to Success, during our tutoring sessions. For students in grades 3-8 who are more than 1 year below grade level, we will use Scholastic’s Do the Math as our primary intervention.

Youth Enriched Academic Resources (YEAR) provides children's supplemental education in a model that is structured for the individual needs of each and every student, providing a hands-on learning experience that is based upon immediate, real world applications and enhancements of the student's reading, math and science skills. The tutoring modules are of the highest academic standard and incorporate the most cutting-edge learning research; utilizing the Pennsylvania Learning Standards and each local school district's curriculum as the benchmarks.

YEAR's education program requires the student, the student's family, the school and YEAR's tutoring staff to work together as a "team." This team ensures the student achieves the level of learning that he or she is capable of.

Research clearly shows children learn, develop and excel in small group-learning environments. YEAR provides this small group-learning environment for each and every student, and, when needed, individual assistance as well.

We take pride in the services we provide and we implement our evidence-based research into all that we do. Our common sense approach helps students discover their academic potential. Together, the "team" will help the student not only reach for the stars, but take his or her academic development to the next level.
